```
(function() {
var s = document.createElement('SCRIPT'), s1 = document.getElementsByTagName('SCRIPT')[0];
s.type = 'text/javascript';
s.src = 'http://widgets.digg.com/buttons.js';
s1.parentNode.insertBefore(s, s1);
})();
```

```
(function() {
  var po = document.createElement('script'); po.type = 'text/javascript'; po.async = true;
  po.src = 'https://apis.google.com/js/plusone.js';
  var s = document.getElementsByTagName('script')[0]; s.parentNode.insertBefore(po, s);
})();
```

If you haven't heard of Honey - and we don't mean the kind that comes from bees - then you're probably spending more than you should when you shop online.

Honey is a browser extension for Chrome and Firefox. All you need to do is install it and start shopping. Honey pretty much does the rest for you.

After installation, the next time you go shopping Honey will make sure you are getting the best deal. In most cases it works automatically. If you shop on Amazon, it is a must have application. That's because when you look at items on Amazon, Honey will compare what you are looking at with the exact same item from other Amazon vendors. It will then tell you if you are getting the best price. If not, it will give you a link to the vendor with the best price. I can tell you from personal experience that the savings can be substantial.

But it doesn't just work with Amazon. It works on other websites too like 1800PetMeds, Macy's etcâ€¦ It searches through known coupon and promotion codes to make sure that you get the best price for whatever you're shopping for.

So don't delay. Get Honey today! Clever, don't you think? And just in case you are wondering, no, we don't have any relationship with the company. We just like the money we save by using their service.

You can get Honey for Chrome here. And you can get Honey for Firefox here.
