

Milestone - 100th Registered User

On December 28th, 2004 - www.GuardMyCreditFile.org registered their 100th user. "Considering that our website only went live June 14th of this year, we feels very fortunate," stated L.E. Tighe, founder and President of ACCESS.

"Currently, we are seeing an average of two new users registering per day. At that rate we should reach 200 registered users by mid-February."

"This is very exciting," Tighe went on to say. "This helps re-affirm the need for what we are providing within this industry."

"We recently added the ability for guests to comment on our articles and hope to integrate a forum into our site. Currently, we are personally responding to e-mails and we would like to have those communications shared with others looking for answers."

"On an average we have about 20 users on-line at any one time, with spikes upto 90. We average about 600 visitors to our site every week."

"What is even more encouraging, is that our very first registered user is still active on our system."

"We hope in 2005 that we are able to increase user participation, find contributor/writers for our website, and increase our influence within Washington. There is a real need to help Congress in overcoming the contributions of big business and begin lissening to the general public about these pressing problems in credit and privacy."

"Our long-term goal is to establish a network of businesses, throughout the United States, to personally provide needed services to area communities."
